NATURAL WOOD STRUCTURES AND RAW EDGES OF FULL TEAK SLABS MEET AN AESTHETIC SENSE OF DESIGN

**Pure dining tables and benches** are not only trendy and sought-after but always unique thanks to their individuality. Each Teak slab is shaped by the natural growth and the grain of the wood. At the edges, the original shape of the tree is still recognizable.

The Pure table has a massive top consisting of 3 naturally grown planks that are cut with the irregular features from nature : unique shape and grains. Only premium mature teak logs that have the highest quality and desired lengths are granted to produce these table tops or benches. The kiln drying process rids the timber of any insects and restores the moisture to a minimum level to make it consistent for outdoors. With these exceptional, irregular tables or benches comes a helping hand to aid longevity. From time to time, the cracks and splits that are the Pure planks natural features, require to be maintained to prevent them from further cracks. **These Pure teak tops are already treaded with Diphano Teak Stain Protector** - an invisible timber impregnator that makes the table top water & dirt repellent while maintaining the beautiful teak colour. For the longer life span of these tables and benches, we advise to apply the teak stain protector once every 6 months.

#### Diphano Teak Stain Protector

Saturates teak to make it repellent to water and moisture.  
Helps to prevent stains (e.g. wine stains, barbecue stains...).  
Easy to apply. Transparent finishing.
